

SUPPORTS
Lytec medisoft™
 (For a nominal fee 2KMobile Link can be linked to other practice management systems)

Never Miss an Appointment.

2KMobile Link offers real time remote access to a physician's practice management database from any device with Internet access. These devices include cellular phones, pda's, laptop and desktop computers.

FROM YOUR MOBILE DEVICE YOU CAN:

- Run the application from any cellular phone with internet access.
- Read and write to your practice management system database in real time with no delay or hotsync of data.
- Create, view and edit patient information.
- Create, view and edit patient appointments.
- Create, view, edit, copy, and print superbills.
- Customize the display on the superbill screen.
- Search the patient database by patient type or category.
- Customize data entry screens with pull down menus.
- Review and edit new mobile entries, setup user rights and profiles, and create superbill rules to reduce claim with the Administrative Panel.
- **NEW!** Create **SOAP and Progress Notes** to post pending charges in the billing system.
